

2022 Overholt Drainage School

March 14 – 18, 2022

Location: The Ohio State University Lima campus, Lima, OH

Join us in March 2022 for the annual Overholt Drainage School.

Topics will include:

- Agricultural drainage concepts
- Drainage design and installation
- Drainage design software
- Soils basics and topographic investigation
- GPS surveying and machine control
- Conservation drainage
- Drainage law

Come prepared to engage in a combination of lectures, field demonstrations, and panel discussions and to practice what you've learned through practical exercises.

Audience: This event is intended for drainage contractors, professional engineers, consultants, district technicians, NRCS and agency professionals, landowners, and anyone interested in subsurface drainage design and maintenance!

Hands-on activities include:

Drainage design exercises

Drainage design software training

RTK-GPS demonstration and training

Team projects

Drainage installation technology

Guidance on conservation drainage practices

Sponsors: Overholt Drainage Education and Research Program, Food, Agricultural and Biological Engineering, OSU Extension, The Ohio State University, in cooperation with, USDA-NRCS, USDA-ARS, Soil and Water Conservation Districts, and Ohio Land Improvement Contractors and Assoc.
