Internship Opportunity

Position Description:

Internships are open to juniors and seniors who are pursuing degrees in Construction Systems Management and Construction Engineering Technology. We are looking for candidates to be Proactive, open-minded, eager to learn, and willing to work hard as part of a team. Interns function in the role of Field Engineers. In-the-field work includes, but is not limited to: project administration, daily take-offs, tracking quantities, collecting job material, and overseeing the project with the on-site superintendent and project manager.

The Internship program has five major objectives:

- (1)** To create a remarkable learning and professional experience for interns so that they will think enthusiastically about construction and what they have learned about the commercial construction industry.
- (2)** To ensure that interns experience the benefits of working for a 21st century construction company.
- (3)** To provide interns with a practical, hands-on learning experience where they will be directly involved in the work.
- (4)** To create a pipeline for the best of the best employees to join Wesney Construction upon graduation from college.
- (5)** To keep Wesney Construction supervisors in touch with the new generation of workers and provide a superior group of candidates to preview.
