Three (3) Graduate Research Associate positions (Ph.D. level) are available in the Bioproducts and Bioenergy Research Laboratory under the supervision of Dr. Yebo Li. The candidates will work on the development of innovative biological and thermochemical conversion processes for production of biofuels and biopolymer from renewable sources. Applicants should have a sound scientific and engineering background in biological engineering, chemistry, food science and technology, environmental sciences/engineering, or chemical engineering and good writing and communication skills. M.S. degree in one of the above subjects is preferred.
