

## ***QUICK ASSEMBLY AND DISASSEMBLY***

In order to make maintenance to the driveline and other subassemblies of the tractor easier for the owner/operator, Buckeye Puller service centers and dealer's maintenance centers to perform routine maintenance and not so routine maintenance on the tractor. The quick assembly and disassembly system is located at specific locations throughout the tractor. The exact locations of these quick assembly and disassembly can be seen in the figures below.

For more information on the quick assembly and disassembly system, please refer to Buckeye Puller's website : <http://buckeyepullers.org.ohio-state.edu/>
