PSI a national engineering and consulting firm seeks recent graduates or those individuals seeking an internship or co-op for immediate employment. The selected candidate for the position will be responsible for performing concrete, soils and asphalt testing and inspection services at construction and project sites through Central Ohio. This is a great way to get real in the field training and understanding the technical, design and practical means and methods during the construction process. The candidate must have reliable transportation and clean driving record. The position will require the individual to work 32-40 per week Monday through Friday.
